Profile

Experienced developer, currently working as a Software Developer at Cavallo in Grand Rapids, Michigan. Collaborative, cooperative, and willing to listen; I approach problems with both an understanding that I don't know everything and a willingness to learn anything.

Experience

SOFTWARE DEVELOPER - CAVALLO - GRAND RAPIDS, MI - 2026-PRESENT

- Embedded within Cavallo Cloud Development, helping develop the Profit Maximization Platform (PMP). Designed to integrate with various distributor ERP systems, PMP transforms noisy and potentially disorganized ERP data into actionable insights to help maximize company profitability.
- Working in conjunction with the data science team, led the design and implementation of an upgraded version of the existing churn prediction machine learning model, running within our ETL pipeline.
- Owned the development of multiple user-facing frontend features within the PMP React app, surfacing to our distributor clients a range of analytics insights and visualizations derived from their historical data.

SOFTWARE ENGINEER - GENERAL MOTORS - AUSTIN, TX - 2020-2025

- Developed backend APIs and frontend account management experiences across the Customer Digital Identity (CDI) and My Account teams, supporting identity services for more than 40 million active users.
- Designed and implemented Spring-based microservices integrating with Azure Active Directory (Entra ID) and Kafka to maintain consistency across distributed identity and account management services..
- Led the modernization of GM's shared sign-in experience, migrating a legacy JavaScript application to Angular and enabling reusable, customizable UI components across multiple GM brands.
- Designed and implemented APIs supporting multi-factor authentication enrollment and invitation-based entitlement workflows for premium customer experiences.

Education

Michigan State University, East Lansing, MI — B.S. Computational Mathematics, 2020
