

Hunter Darling

+1 (616) 928-5331 hunterperryd@gmail.com [Spring Lake, MI](#)

Experienced developer, most recently employed as a Software Engineer at General Motors. Collaborative, cooperative, and willing to listen; I approach problems with both an understanding that I don't know everything and a willingness to learn anything.

Experience

SOFTWARE ENGINEER, GENERAL MOTORS, AUSTIN, TEXAS – JUNE 2020–SEPTEMBER 2025

- Utilizing a variety of technologies, helped build and maintain robust, well documented APIs with Java in a Spring framework as well as create fluid, user-friendly interfaces with both Angular and React.
- Worked in conjunction with multiple teams in the Foundational Services organization simultaneously to support General Motors' online customer experience, including backend development on the API platform with the Customer Digital Identity (CDI) team, as well as frontend development on the user-facing account management web application with the My Account team.
- Maintained and improved multiple developer-oriented tools to facilitate management of our application services as well as helped create an external-facing application specifically designed to assist teams at GM with onboarding to the CDI API platform.
- As innovation team lead for the Global Profile Management Service application suite, acted as consuming applications' point-of-contact for live support and oversaw all production code deployments via Azure DevOps. Contributed to technical discussion regarding the development of an application that handles storage and management of the data of over 40 million active users.
- Helped design and then created the initial version of the enhanced account creation APIs for GM's VIP customer onboarding flow introduced to support the rollout of the Cadillac Celestiq.
- Spearheaded the planning and implementation of an overhaul of GM's customer facing common sign in page from a vanilla Javascript application to a more extensible and componentized Typescript application utilized by numerous different General Motors web services.

Education

Michigan State University, East Lansing, MI – B.S. Computational Mathematics, 2020

Skills

- Programming Languages: Java, Typescript, Python
- Frameworks & Libraries: Spring, Node.js, Angular, React, Next.js, JUnit, Jest
- Technologies & Tools: Oracle DB, Postgres, Apache Kafka, Redis, Azure Cloud, Docker, Kubernetes, GitHub Actions, ArgoCD
